Subject: Clean Room Packaging Transition
Date: January 30, 2013

Colder Products Company is enhancing the packaging of the products manufactured in its ISO 7 cleanroom environment by transitioning to heat-sealed double 4 mil bags. Currently, all products are double-bagged prior to exiting our cleanroom. The new process will provide heat-sealing of both the inner bag and outer bag (previous packaging procedures included the use of twist ties in lieu of heat sealing). This enhancement will provide further protection to the cleanliness of our products.

The following part numbers are affected by the transition:

2260100	MPC22004T03MB25	MPCK17002T03	MPX22803M
2260200	MPC22004T39	MPCK17002T03B25	MPX22803MB25

Catalog part numbers will not change. We anticipate products with the new packaging will start to ship during the 3rd quarter of 2013. Colder's existing stock will be depleted before the new version is placed into production.

Please email me at todd.andrews@colder.com with any questions.

Sincerely,

Todd Andrews
